What is a Living Classroom?

A model of learning and practice for healthcare education alongside residents, families and team members in long-term care. This allows students to learn and grow in real-time from real-world care.

- **Students:** Build confidence and skills through practical experience.
- **Residents and Families:** Receive extra care and have opportunities to mentor students.
- **Team Members:** Get additional support with resident care, and grow as leaders.

Immersive learning.
Compassionate care.
Future ready.
